Providing
 Full-Service
 Environmental
 Solutions
 Throughout the
 Southeast

A&D Environmental provides a diverse range of environmental and industrial services in a responsible, accountable manner that reduces risk and delivers peace of mind to the customers, communities, and consultants we serve.

With our industry expertise, broad-based experience, and geographic coverage, we are a “one-stop shop” that can manage environmental and industrial issues of virtually any size and scope from start to finish. A&D’s high-quality, high-value capabilities include:

- Industrial Services
- Remediation
- Waste Management
- Emergency Response
- Transportation

We serve an equally broad range of commercial and industrial market sectors as well:

- Environmental consulting
- Retail
- Real estate
- Healthcare
- Education
- Transportation industry
- Pulp and paper
- Chemical and pharmaceutical manufacturing
- General and specialty manufacturing
- Petroleum
- Energy
- Waste management

Beyond all that, A&D is financially sound and secure. This ensures not only that we have the means to provide whatever technical and professional resources our customers need, but also that we have the financial strength to stand behind everything we do — and to take full responsibility for our performance, our team, and our results.

This blend of expertise, skill, experience, and stability — combined with an exceptional compliance history and a proven track record of safety — has made A&D a preferred provider of confident, no-worry services that ensure maximum environmental protection while minimizing the risk and liability to our customers.

Turn-key Capabilities that Ensure True Peace of Mind

A&D Environmental offers a comprehensive range of reliable, proven industrial and in-plant maintenance services that minimize risk and deliver total peace of mind. With our broad capabilities and stable of experts, we can be your single-source provider of safe, secure solutions that reduce the need for multiple vendors, lower total cost, and increase accountability.

Competitive, comprehensive, quality services.

We have the experience to handle projects of any scope and size, with turn-key industrial services that include:

- Storage tank cleaning
- Process equipment and process line cleaning
- Video line inspections
- Facility decontamination in multiple industries
- Demolition operations
- High-pressure and Ultra High-pressure water blasting, surface preparation, tank and pipe cleaning
- Cryogenic (dry-ice) blasting
- Media blasting (such as sponge, soda, walnut shell, and others)
- Specialized chemical cleaning of heat exchangers, boilers, process piping, etc.
- Vacuuming and pumping for liquids, sludges, and solids
- Mobile storage tanks
- Combustible dust removal

Rapid, responsive deployment. A&D is strategically located with multiple offices throughout the Southeast. So we can get on-site quickly, ramp up fast, and deliver whatever you need, whenever and wherever you need it.

More expertise, for greater confidence. Our expertise in industrial and in-plant maintenance services ensures that we understand the job immediately and get it done right – on time, on budget, safely, and in full regulatory compliance.

Financial strength and security. A&D is financially sound, stable, and secure. This ensures that we have the means to bring the right resources, technology, and equipment to any job.

Total accountability. With our experience, skill, and financial security, we can confidently stand behind the work we do. We understand that accountability inspires confidence, and we take complete responsibility for our performance, our team, and our results.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven record of safety. This background – which has helped us maintain strong working relationships with regulators – combined with our expertise and skills enables A&D to minimize potential risks to customers by providing no-worry, highly confident service.

MAXIMUM Protection MINIMUM Risk TOTAL Peace of Mind

Remediation Services

Maximum protection and security. Minimum risk and liability.

A&D Environmental provides proven remediation services that have three bottom-line goals: 1) to ensure that contaminated sites pose no threat to your business, your employees, and the community; 2) to reduce the potential for future regulatory actions; and 3) to minimize the risk and liability to customers. Our fully trained, highly qualified experts bring a range of resources – technical as well as professional – to jobs of any size and complexity, ensuring that we can provide the solutions you need for total confidence and ultimate peace of mind.

High-value scope of services. A&D is a one-stop shop, offering comprehensive capabilities that reduce your number of vendors and ensure maximum reliability and responsiveness. All this serves to lower your total cost and minimize your risk. Our services include:

- Contaminated soil management and soil stabilization
- Underground storage tank removal
- Stream restoration
- Air sparging/soil vapor extraction systems
- Piping and fabrication, including HDPE
- Contamination removal inside buildings and facilities
- Brownfield redevelopment
- Groundwater remediation
- On-site waste minimization
- AFVR/MMPE
- Landfill gas system installation, monitoring, tuning, and maintenance
- Installation of landfill cells, liners, and caps
- Landfill closure
- Lagoon cleaning, closure, and maintenance
- Sludge dewatering
- On-site treatment options such as in-situ and ex-situ chemical oxidation, metals stabilization, and thermal treatment

The right equipment for any job. A&D owns and maintains an array of heavy equipment including track excavators, track loaders, dozers, backhoes, skid-steers, and a fleet of company-owned dump trucks, dump trailers, rollofs, and tankers. So regardless of the size or complexity of the project, we can mobilize the right assets for a fast, effective response.

Turnkey system installation. We offer complete installation services for soil and groundwater remediation systems, as well as system operation and maintenance. This in-house capability translates to greater value and faster turnaround times for customers.

Total accountability. With our experience and financial security, we can confidently stand behind the work we do. We take complete responsibility for our performance, our team, and our results.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven record of safety. This background – which has helped us maintain strong working relationships with regulators – combined with our expertise and skills enables A&D to minimize potential risks to customers by providing no-worry, highly reliable service.

Waste Management

Safe, secure services that add value and reduce risk

A&D Environmental has the skills and expertise to provide the secure management of hazardous, industrial, and non-hazardous waste. We offer a full range of services – from sampling and identification to disposal – and deliver them all with a focus on value, effectiveness, and responsiveness. With the financial strength to back up everything we do, A&D is your single source for turn-key solutions that preserve the environment, protect your business, and ensure ultimate peace of mind.

One-stop environmental shop. A&D's wide range of capabilities and multiple locations ensure that you can get all of the high-quality waste management services you need from one provider, assuring maximum value and minimum risk.

- Waste sampling, lab analysis, identification, and classification
- Lab pack services, including identification, segregation, packaging, and transportation
- Hazardous and non-hazardous waste removal and disposal
- Non-hazardous waste solidification
- Oil/water separation and recycling of used oils
- Biohazard services
- Mercury cleanup at schools, hospitals, and government and industrial facilities
- eWaste and Universal waste management, including recycling
- Industrial by-product management for plating operations
- 10-day hazardous waste transfer facilities

Advanced non-hazardous solidification and disposal. A&D uses advanced techniques to handle non-hazardous material, including bulk solidification, blending, or recycling. The stabilization units are protected from the elements, operate year-round, and can accommodate more than 400 tons of material daily.

Hazardous waste disposal.

A&D provides complete hazardous waste services for jobs ranging from

small quantities to full truck loads. This includes ensuring proper manifesting and transportation of hazardous waste to permitted treatment, storage, and disposal facilities in the United States and Canada.

Fully trained environmental professionals. Our field staff of fully trained environmental professionals meets or exceeds federal training requirements for handling waste materials, ensuring that we bring reliability, quality, and integrity to each project.

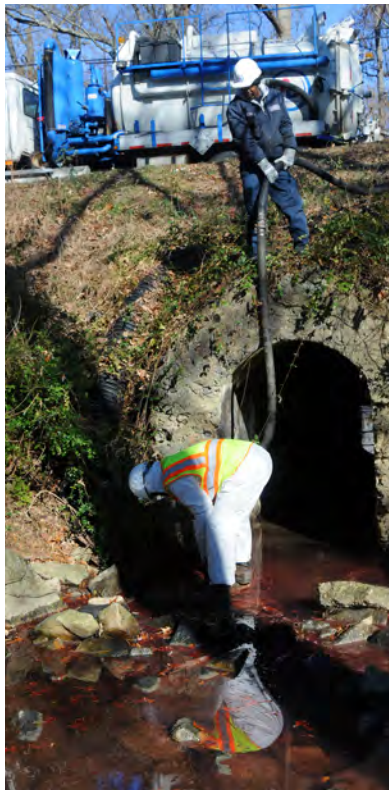

Financial strength and security. A&D is financially sound, stable, and secure. This ensures that we have the means to bring the right resources, technology, and equipment to any job.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven record of safety. This background – which has helped us maintain strong working relationships with regulators – combined with our expertise and skills enables A&D to minimize potential risks to customers by providing no-worry, highly confident service.

Emergency Response

Protecting the Environment – and Our Customers

A&D's emergency response services are designed to protect the environment and to minimize the liability of the customers we serve. Our wide range of capabilities and multiple locations enable us to get to your location fast and evaluate the situation, coordinate the response, contain the release, move waste offsite, provide information and reports to regulators, and help restore the site to its original state. With our broad expertise, A&D is your single-source solution for incidents of virtually any size or complexity.

Turnkey capabilities. A&D has the equipment and technical resources to deliver a scope of high-quality, highly competent response services on a 24/7/365 basis:

- Industrial releases
- Site cleanups involving chemical, petroleum, or PCB releases on the highway or at your facility
- Crime scene and other biohazard cleanups
- RCRA and TSCA wastes
- Low-level radiation decontamination and material management team
- Mercury decontamination
- Land and water oil response

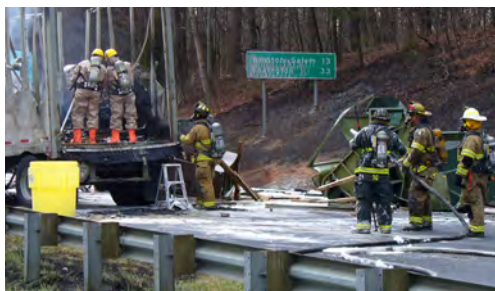

Rapid response. An A&D professional will be onsite quickly to conduct an inspection and formulate an accurate response plan.

Focus on safety. We are committed to providing and maintaining safe onsite working conditions, including informing stakeholders of hazards and protective measures; preparing site-specific health and safety plans; and developing evacuation logistics.

Experience you can trust. Our environmental specialists have many years of experience providing a wide range of emergency response services.

Demonstrated expertise. A&D is Region 4 Response Team Member and is a certified railroad responder. Additionally, we have numerous Emergency Response Agreements with manufacturers, local municipalities, and other governmental agencies, and regularly respond to requests for assistance.

Financial strength and security. A&D is financially sound, stable, and secure. This ensures that we have the means to bring the right resources, technology, and equipment to any job.

Total accountability. With our experience and financial security, we can confidently stand behind the work we do. We take complete responsibility for our performance, our team, and our results.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven record of safety. This background – which has helped us maintain strong working relationships with regulators – combined with our expertise and skills enables A&D to minimize potential risks to customers by providing no-worry, highly confident service.

Reliable, Responsible, Secure

A&D Environmental's turnkey services include the reliable, responsible transportation of hazardous and non-hazardous solids, sludges, and liquids, in both drum and bulk quantities. With a full range of capabilities and broad, deep experience, we have what it takes to deliver high-quality, highly competent transportation services that offer great value, reduce your risk, and provide complete peace of mind.

Geographic reach and rapid response. We are permitted to transport hazardous waste in 27 states, giving us the ability to respond rapidly to any service request and deliver the results you need, when you need them.

Modern fleet. As a certified/licensed waste transporter, we own a fleet of vehicles that meet or exceed every applicable regulatory requirement. The fleet includes van trailers, dump trailers, vacuum trucks, bulk and vacuum tankers, roll-off boxes, vacuum boxes, and sludge boxes.

Value. In addition to having some of the industry's most competitive rates, A&D is a one-stop shop where our customers depend on us to manage their industrial, waste, remedial, and emergency response needs. This enables us to be a high-value provider of transportation services that save you time, money, and headaches.

Compliance confidence. We have the technical skills to assist in providing the proper classification of products and materials to help clients stay in compliance with all appropriate transportation-related regulations at all levels of government.

Financial strength for added accountability. A&D is financially sound, stable, and secure. This ensures that we not only have the resources to provide the broadest possible range of services, technology, and experience to our customers, but that we also have the financial strength to back up everything we do.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven track record of safety. This background – which has helped us maintain strong working relationships with regulators – combined with our expertise and skills enables A&D to minimize potential risks to customers by providing no-worry, highly confident service.
