

Remediation Services

Maximum protection and security. Minimum risk and liability.

A&D Environmental provides proven remediation services that have three bottom-line goals: 1) to ensure that contaminated sites pose no threat to your business, your employees, and the community; 2) to reduce the potential for future regulatory actions; and 3) to minimize the risk and liability to customers. Our fully trained, highly qualified experts bring a range of resources – technical as well as professional – to jobs of any size and complexity, ensuring that we can provide the solutions you need for total confidence and ultimate peace of mind.

High-value scope of services. A&D is a one-stop shop, offering comprehensive capabilities that reduce your number of vendors and ensure maximum reliability and responsiveness. All this serves to lower your total cost and minimize your risk. Our services include:

- Contaminated soil management and soil stabilization
- Underground storage tank removal
- Stream restoration
- Air sparging/soil vapor extraction systems
- Piping and fabrication, including HDPE
- Certified installer of spray applied vapor intrusion barriers
- Contamination removal inside buildings and facilities
- Brownfield redevelopment
- Groundwater remediation
- On-site waste minimization
- AFVR/MMPE
- Landfill gas system installation, monitoring, tuning, and maintenance
- Installation of landfill cells, liners, and caps
- Landfill closure
- Lagoon cleaning, closure, and maintenance
- Sludge dewatering
- On-site treatment options such as in-situ and ex-situ chemical oxidation, metals stabilization, and thermal treatment

The right equipment for any job. A&D owns and maintains an array of heavy equipment including track excavators, track loaders, dozers, backhoes, skid-steers, and a fleet of company-owned dump trucks, dump trailers, rolloffs, and tankers. So regardless of the size or complexity of the project, we can mobilize the right assets for a fast, effective response.

Turnkey system installation. We offer complete installation services for soil and groundwater remediation systems, as well as system operation and maintenance. This in-house capability translates to greater value and faster turnaround times for customers.

Total accountability. With our experience and financial security, we can confidently stand behind the work we do. We take complete responsibility for our performance, our team, and our results.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven record of safety. This background – which has helped us maintain strong working relationships with regulators – combined with our expertise and skills enables A&D to minimize potential risks to customers by providing no-worry, highly reliable service.
