

Waste Management

Safe, secure services that add value and reduce risk

A&D Environmental has the skills and expertise to provide the safe, secure management of non-hazardous, industrial, and hazardous waste. We offer a full range of services – from sampling and identification to disposal – and deliver them all with a focus on value, effectiveness, and responsiveness. With the financial strength to back up everything we do, A&D is your single source for turnkey solutions that preserve the environment, protect your business, and ensure ultimate peace of mind.

One-stop environmental shop. A&D's total capabilities ensure you can get all of the high-quality waste management services you need from one provider, assuring maximum value and minimum risk.

- Waste sampling, identification, and classification
- Lab pack services
- Hazardous and non-hazardous waste removal and disposal
- Non-hazardous waste solidification
- Oil/water separation and recycling of used oils
- Biohazard services
- Mercury cleanup at schools, hospitals, and government and industrial facilities
- eWaste and Universal waste management, including recycling
- Industrial by-product management for plating operations

Advanced non-hazardous solidification and disposal. Our disposal facility uses advanced techniques to handle non-hazardous material, including bulk solidification, blending, or recycling. The stabilization unit is enclosed and operates year-round, and can accommodate more than 150 tons of material daily.

Hazardous waste disposal. A&D provides complete hazardous waste disposal for jobs ranging from small quantities to trailer loads. This

includes ensuring proper manifesting and transportation of hazardous waste to certified treatment, storage, and disposal facilities in the United States and Canada.

Fully trained environmental professionals. Our field staff of more than 150 environmental professionals meets or exceeds federal training requirements for handling waste materials, ensuring that we bring reliability, quality, and integrity to each project.

Financial strength and security. Unlike many companies in the environmental services industry, A&D is financially sound, stable, and secure. This ensures that we have the resources to bring the right resources, technology, and equipment to any job.

Minimized risk, no-worry service. We have an exceptional compliance record, and a proven record of safety. Combined with our expertise and skills, this background – which has helped us maintain strong working relationships with regulators – enables A&D to minimize potential risks to customers by providing no-worry, highly reliable service.

MAXIMUM Protection

MINIMUM Risk

TOTAL Peace of Mind
